

# ものづくり館 by YKK Website

The Craft Lab by YKK is a community and events facility owned by zipper and button manufacturer YKK. On each floor, we hold various events and arts & crafts workshops, and display many types of zippers and buttons.

## 1st Floor WORKSHOPS

In this space, visitors can experience “monozukuri,” or the spirit of craftsmanship in manufacturing, through arts & crafts workshops. In addition to workshops using zippers and buttons sponsored by The Craft Lab by YKK, we also host events sponsored by external organizations.  
\*Workshops are held in Japanese.

## 2nd Floor THE SCHOOLHOUSE

This is a display space where you can learn about the way a zipper works and its history. At the large table in the center of the room, you can experience simple manufacturing and experiment with “Kisekai kuma-chan” a fashion simulator that lets you choose outfits for a cute stuffed bear.

## 3rd Floor CREATIVE LOUNGE

This floor contains exhibition space introducing special items and trend information on zippers and buttons. This space is also available for designers and creators to exchange information.

## 4th Floor SEMINAR ROOM

This space is used to host study sessions for students about zippers and buttons, fashion-related seminars, and various exhibitions. The space can also be rented by external organizations.
